

12th July 2024

Attention: Kate Bryant

In response to your letter with recommendations from Coroner McGregor, NATA has corresponded with NPAAC who are responsible for developing and maintaining accreditation standards for Australian pathology laboratories.

We have brought the recommendation regarding reference intervals to NPAAC's attention and requested its consideration as part of the upcoming review of NPAAC Requirements for point of care testing (Second Edition 2021) due in 2024.

NPAAC themselves are best placed to determine how they will respond to the coroner.

Regards,

A handwritten signature in blue ink that reads "A Vandenberg". The signature is written in a cursive, flowing style.
